## PROFESSIONAL PROFILE

I have experience as a Full Stack Developer, leading and implementing web and mobile projects with a strong focus on modern interfaces, scalability, and user experience. I have worked with multidisciplinary teams applying agile methodologies, successfully reducing load times and improving efficiency in real-world environments. I stand out for proposing technical solutions that boost productivity, streamlining the onboarding of new developers, and enhancing product architecture.

## WORK EXPERIENCE

### Full Stack & Cloud Solutions Architect

#### Zatobox | Aug 2025 - Present

- Led the end-to-end development and DevOps strategy of a beta-stage application, managing 100% of the architecture, infrastructure, and deployment.
- Implemented advanced data recognition systems, increasing processing efficiency by 30% and strengthening platform resilience.
- Standardized workflows and development best practices, achieving 0 critical incidents during beta and accelerating delivery speed by 40%.
- Took on the combined role of Full Stack + DevOps Lead, managing CI/CD, monitoring, and coordination to deliver high performance, production ready platform.
- Applied best practices, testing, and version control with Git.

### Full Stack Developer

#### Dragon Pyramid | June 2025 - Present

- Developed modern, responsive, and accessible interfaces using Next.js 14, TailwindCSS, and Shadcn UI, optimized for desktop and PWA.
- Implemented secure authentication with NextAuth and real-time data handling with Supabase.
- Built reusable components and smooth navigation systems to enhance UX.
- Collaborated closely with UX/UI and backend teams to deliver a scalable and maintainable product.
- Applied best practices, testing, and version control with Git.

### Full Stack Developer (freelance)

#### Agosto 2024 - Present

- Led the development of diverse projects including e-commerce, marketplaces, and administrative platforms.
- Designed and implemented modern, functional UI/UX, applying agile methodologies.
- Integrated APIs and managed databases (PostgreSQL, MongoDB, Supabase, Firebase).
- Coordinated with clients and teams to iterate quickly and deliver scalable solutions.

## ACHIEVEMENTS

- Led the full development of web and mobile interfaces, enhancing user experience and reducing load times by up to 40%.

- Organized and documented reusable components, streamlining teamwork and accelerating development of new modules.
- Proposed and implemented frontend architecture improvements that reduced production bugs and facilitated product scalability.
- Collaborated with design and backend teams to launch MVPs under tight deadlines, meeting key client objectives.
- Provided technical support to fellow developers and facilitated onboarding for new team members in ongoing projects.

## EDUCATION

---

### Instituto Superior Santo Domingo (ISSD)

Technical Degree in Web and Digital Applications Development (In progress)

### Código Facilito

Advanced Frontend Development Specialization. (In progress)

### Henry

Full Stack Development Bootcamp. (Finished).

### Coderhouse

Full Stack Development Career (Completed)

## TECHNICAL SKILLS

---

**Front-end:** React, Next.js, Astro, Vue.js, Nuxt.js, Angular.

**Styling:** Tailwind CSS, CSS, Sass, Less, Figma.

**Back-end:** Node.js, NestJS, Python, Django, Java, Rust.

**Databases:** PostgreSQL, MySQL, MongoDB, Supabase, Firebase.

**Tools / DevOps / Cloud:** Git, GitHub, Docker, AWS, Azure.

## LANGUAGES

---

- Advanced English. C1 Level (FCE).
- Native Spanish.

## AVAILABILITY

---

Full availability. Immediate Start.
